Consultations and Fees

- 8 one-on-one sessions with a Practitioner
- Around 1-1.5 hours each session

Introductory Session: **FREE**

Materials: \$ 380

Follow Ups: \$300

Fertility Appreciation

What is the CREIGHTON MODEL FertilityCare™ System

The **CREIGHTON MODEL FertilityCare™ System** helps women find their fertility window every cycle by observing biomarkers like their mucus

- ✓ **Increases the chances** of subfertile or infertile couples in achieving pregnancy
- ✓ Helps couples avoid getting pregnant
- ✓ Gives you and your spouse a deeper understanding of your own reproductive health

Benefits of the CREIGHTON MODEL FertilityCare™ System

- ✓ **Organic**
- ✓ **No side effects**
- ✓ **Able to understand your and your spouse's reproductive health**
- ✓ **Helps couples grow in intimacy**
- ✓ **Aids in marital communication**
- ✓ **A method of family planning that is approved by the Catholic Church because**
 - It does not use physical or chemical barriers to hinder our fertility
- ✓ **Allows couples to live out the gift of self to each other**

How can the CREIGHTON MODEL FertilityCare™ System help couples struggling with Infertility?

The **CREIGHTON MODEL FertilityCare™ System** can help you identify causes of infertility, such as

Limited mucus / dry cycles

Hormonal problems

Polycystic Ovarian disease (PCOD)

Male infertility

Through **NaProTECHNOLOGY®*** doctors can provide medical and/or surgical treatments that cooperate completely with the woman's reproductive system and increase her chances of achieving and maintaining a pregnancy.

***NaProTECHNOLOGY®** is a new women's health science that monitors and maintains a woman's reproductive and gynaecological health.

What is the success rate of the CREIGHTON MODEL FertilityCare™ System and NaProTECHNOLOGY®?

According to studies in the United States, 76% of couples with normal fertility are able to conceive during the 1st stcycle of using the **CREIGHTON MODEL FertilityCare™ System**.

For couples struggling with infertility, 20-40%* of couples were able to conceive if they only used the **CREIGHTON MODEL FertilityCare™ System**, which is on par with IVF success rates.

Should these couples also choose to use **NaProTECHNOLOGY®** their success rate may reach up to 80%*.

(*Success rates depend on the different causes of infertility)

(<https://www.ncbi.nlm.nih.gov/pubmed/9653695>)

IVF	NaProTECHNOLOGY®
CANNOT find the cause of infertility >50% of the time	IDENTIFY the cause of infertility causes > 90% of the time
CANNOT improve a couple's natural fertility	CAN improve a couple's natural fertility
Creates life in a lab	Husband and wife create life together through the natural act of intercourse
Creates lots of embryos that may not ever be used	Naturally conceive a child
